

**Student Voices :** I am presenting my Canva poster on Guru Nanak Jayanti (Birthday Card). I chose simple colours, clear fonts, and useful images to make my ideas easy to understand. My poster shows the main points in a neat layout. I learned how to design, arrange information, and use Canva tools. I enjoyed creating this poster, and this project helped me express my creativity while improving my visual communication skills.

# Project Report and Skill Development

Canva club

Tajinder Kaur 10/11/25

**Project Goals:** The goal of the Canva project is to help students create neat and creative designs while learning basic digital design skills. It encourages them to express ideas clearly through simple posters, slides, and graphics.

**Process/ Steps:** 1.introduction of a new concept  
2.Explore the topics

**Skills Learned :** 1.Digital design skills  
2. Creativity and innovation  
3. Technical proficiency

## Challenges and solutions :

Difficulty in understanding new digital design tools. Step-by-step demonstrations and practice sessions were provided to build confidence, which helped in learning and applying the tools more effectively.
