

App Innovators

Club project spotlights :

Students have creatively designed Secure vault and Skill Exchange App to make daily life easier and safer. With Secure Vault Users can lock their data and access it using a secure PIN system. Skill Exchange app helps employers to find employees for required job.

Student Voices :

Students shared that working on these apps helped them understand real-life problems and think of practical solutions. They enjoyed creating an app that can actually be useful for people. These projects also improved their teamwork, creativity and confidence.

Project Report and Skill Development

App Innovators

Chamandeep Kaur- 9/05/2026

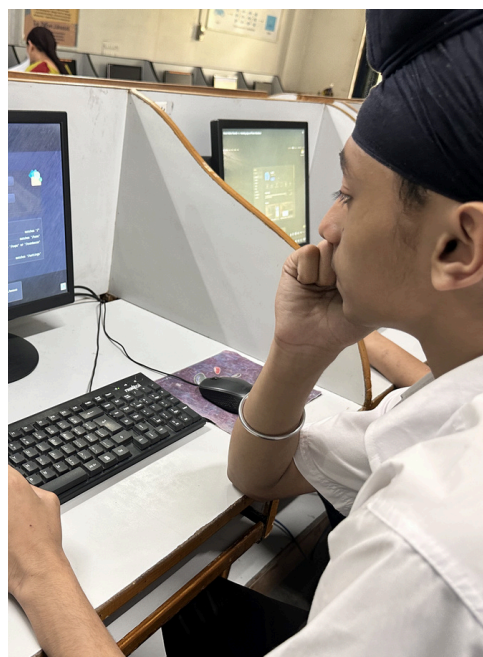

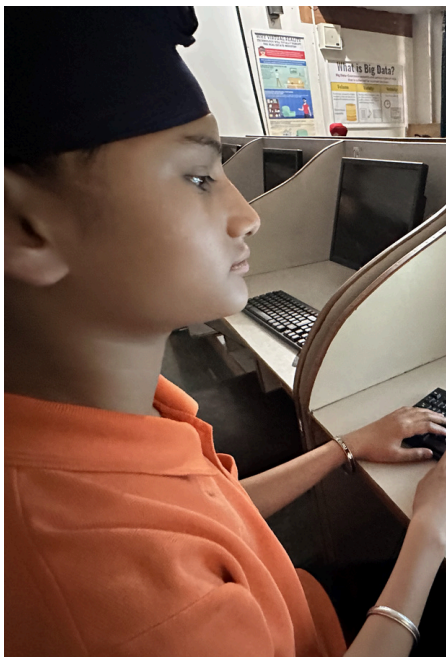

Project Goals: A smart app that keeps your personal data safe using encryption and secure PIN protection. A platform that helps employees discover job opportunities, connect with recruiters, and build their careers.

Process/ Steps: Students identified a real-life problem, planned app features, designed a user-friendly interface, developed app and tested its functionality.

Skills Learned : Students developed problem-solving and critical thinking skills. They enhanced their creativity, managed time effectively.

Challenges and solutions :

Students faced difficulties in app logic, handling data storage and fixing bugs. These issues were resolved through regular practice, guidance and testing app. multiple times.
