

**Student Voices :** Scratch is not just a coding platform, it is a place where our imagination comes alive. Every block we connect turns our ideas into movement, sound and color. It makes us feel proud when our character walk, talk and play exactly the way we imagined. Scratch teaches us that mistakes are not failures but steps toward learning. It gives students the confidence to think ,create and innovate.

# Project Report and Skill Development

Code Warriors

Inderpreet Kaur 05/01/2026

## Project Goals:

The goal of this Scratch project is to build confidence in using technology and expressing ideas digitally.

## Process/ Steps:

By using paint editor in Scratch, we selected different shapes, vibrant and eye catching colors and many tools to draw the desire background to match with our scratch project.

## Skills Learned :

By using paint editor, we learned digital drawing, creativity use of paint editor tools, color selection and improved our designs and computer skills.

**Challenges and Solutions :** Challenge:- Making the project interesting, engaging, informative and interactive. Solution:- By adding scoring levels and user controls to improve engagement.

## Meet the Team :

Vihaan Bhutani 5G

Prabhnoor Singh 4A

Rayandeep Singh 4A

Arush Kumar 4B
