

Club project spotlights :

- Craft keychains, jewellery, and photo frames to explore and master diverse resin art techniques.
- To learn basic crochet techniques by successfully creating a simple, uniform chain stitch and single crochet swatch, following proper tension and stitch consistency.

- Student Voices :**
- Students learn techniques to improve the adjustment of the pictures and material according to need.
 - Practicing single and double crochet chain improve the eye-hand coordination.

Project Report And Skill Development

RESIN ART

DALJIT KAUR- 09/05/2026

Project Goals:

- Create a lasting representation of a person that captures not just their physical likeness also their essential character or spirit.

Process/ Steps:

- Students made a basic chain of thread.
- Start to create the elaborated design by following the same pattern.
- Let add the new color to make it more appealing and contrasting.
- Add the final touches to it.

Skills Learned :

- Students masters in basic crochet patterns which improves their hand and eye coordination.
- The rigorous process of breaking down complexity and constructing form teaches a transferable methodology for both art and life's challenges.

Challenges and solutions :

- Facing difficulties in identifying the right proportion and color scheme for the artifact.
